BROWNING® SAFES SAFE FEATURES HOME SECURITY & FIRE PROTECTION:

CHILDPROOFING: Browning® safes cannot be opened without the combination. No child can have access to your firearms unless they know the combination of your safe

BURGLAR & FIRE PROTECTION: Duo-Formed door is formed from a continuous piece of steel plate bonded to a second plate & fused to a rigid length of double-formed, custom shaped steel for an overall door edge thickness of 1-5/16''. The door is extremely pry resistant, exceeds U.L. tool attack certification standards. Duo-Formed allows Browning to install a 1'' thick layer of its own high-tech Imprafill™ fire-proofing material sandwiched between the steel plates, increasing to 1-1/2'' the total fire-resistant material. This construction places no weld or seam where they can be attacked, since no welding is required on the door face, there is no heat damage or warping during manufacturing Exterior hinges allow 180º door opening & installation of fireproofing material around the entire door frame. Unsurpassed for security, every safe features a heavy-duty S&G Group II, UL listed bank-type combination lock with a spy-proof shield, internal relocker & hardplate protection. Massive 1-1/4'' diameter cold rolled steel bolts, installed in the door to exacting tolerances, guard the door's perimeter. Uni-force Locking System prevents outside pressure to the locking bolts from being transmitted to the lock. The OmniBarrier™ lock protection system consists of multiple layers of case hardened steel in front of the main locking system, as well as a 1/4'' steel plate behind, creating an attack resistant barrier. Platinum & Gold series safes include an additional case hardened anti-drill tungsten deflector plate. When excessive force is applied to the handle, the shear pin snaps free & the handle spins, eliminating the possibility for lock damage. The Vault-type Cam System locks bolts in the top and sides of the door securely in place.

BROWNING® CONSERVATION SAFES

Browning®/Pro-Steel Conservation Series safes are a great way to support hunting & the organizations that work to preserve our hunting heritage. These respected organizations strive to conserve & manage wildlife & habitat for present & future generations while promoting hunting in a positive manner. A portion of the proceeds of every Conservation Series safe sold goes directly to the respective conservation organization. Every safe features a baked-on finish with an exclusive game scene bonded to the door, OmniBarrier™ System & Uni-Force™ Locking System. Each model is UL tool attack listed, has an S & G Group II lock with key lock dial, 5-year limited warranty & is Omega Point Laboratories 1550°F fire-resistance listed. The plush Duo Interior is fully carpeted with an elevated floor to facilitate removal of guns.

BROWNING® MEDALLION SERIES

•Heavy, 10-gauge steel body •1-1/4'' diameter chromed locking bolts •OmniBarrier™ & Uni-Force™ systems create a rugged, protected locking system •1-5/16'' Duo-Formed door •UL tool attack listed •S & G group II lock with keylock & 5-year S & G limited warranty •Large gold metallic whitetail deer scene bonded to surface of safe door •Elevated floor to facilitate removal of guns •Baked-on, high-gloss finish •1200ºF/75 min. fire protection listed & labeled by Omega Point Laboratories •Two 1/2'' layers of fire-resistant material in the safe body •One 1/2'' layer of fire-resistant material on the door back panel & a 1'' layer of Imprafill™ insulation in the door face •Tan interior

Browning Safes Freight Chart

BROWNING®/PRO-STEEL NEGOTIATED FREIGHT RATES

Of necessity, Browning® Pro-Steel safes are heavy because they're constructed to withstand attack or removal from the home. Because safes are heavy, most customers are concerned about the unknown freight costs.

Customers envision unreasonable costs, which is not the case. Our shipping volume has enabled us to negotiate substantial discounts, which we pass along to you and your customer. These rates are guaranteed to us for the period of January 1, 2014 through December 31, 2014, and are applicable to most shipping points in the United States, excluding Hawaii, Alaska and Utah.

Note: Rates are subject to fuel or other surcharges that may be imposed because of unusual economic conditions. A fuel surcharge of 1% to 6% may be added to these rates by the freight carrier. Charges mayy be higher to some destinations not directly served by Browning® carriers. Rates effective January 1, 2014 through December 31, 2014. Applicable only to prepaid and add shipments.

The table below enables you to know your freight cost before you order. You can ease any customer's objection to freight by showing him how reasonable freight will be on Browning® Pro-Steel safes.
